Art Unit: 1746

1. Claims 7-11, 16 and 19 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on September 18, 2006.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 17 and 18 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bellati et al. (U. S. Pat. No. 5,058,946) in view of either Yaeger et al. (U. S. Pat. No. 4,490,975) or Johnson (U. S. Pat. No. 4,965,545).

Re claim 1 for example, note the reservoir 302 and the shape memory wire (col. 12, lines 50-64) in Bellati. Therefore, claim 1 defines over bellati only in the recitation of the electric current for heating the memory wire. Yaeger and Johnson disclose the arrangement of providing a memory metal actuator where the actuator is heated by an electric current (see 50 figs.6-8 in Yeager and 34 in Johnson). It therefore would have been obvious to one having ordinary skill in the art to modify the device of Bellati, to be heated by an electric current, for the purpose of providing precise control of the actuator. Re claims 3, 4, 20 and 21, to have the actuator including a lever is disclosed by Johnson (see fig. 2).

Art Unit: 1746

4. Claims 5, 6, 12 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In Yamamoto et al., Morgan, Davenet et al., Japan'435, Japan'498, Japan'654, Japan'689 and Castelli et al., note the actuators.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to FRANKIE L. STINSON whose telephone number is (571) 272-1308. The examiner can normally be reached on M-F from 5:30 am to 2:00 pm and some Saturdays from approximately 5:30 am to 11:30 am.
